FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Currently, the H. T. Mattern "L" No. 3 is equipped with 100 psi differential flow valves. Since the well does not flow continuously due to inability to maintain a minimum casing pressure of 450 psi, we propose to connect to the casinghead gas on well no. 9, a direct offset well on the same basic lease, and utilize the energy in well no. 3.
