

Place Hobbs, New Mexico
Date May 30, 1939

6/2/39

W. W. Stanley

Production Umpire
Hobbs, N.M.

NOTICE OF COMPLETION OF: (Lease) State # 157 "D" (Well No.) 2
350 feet from North line, 1650 feet from West line S.T. & R.
South half Sec. 12-225-36E Lea County, New Mexico

DATE STARTED May 10, 1939
DATE COMPLETED May 29, 1939
ELEVATION 3480 - Top of Controlhead
TOTAL DEPTH S.M.M. 3759
CABLE TOOLS _____: ROTARY TOOLS 3759

CASING RECORD

SIZE <u>10 3/4" OD</u>	DEPTH <u>311</u>	SIX CEMENT <u>250</u>
SIZE <u>7" OD</u>	DEPTH <u>3656</u>	SIX CEMENT <u>250</u>
SIZE _____	DEPTH _____	SIX CEMENT _____

TUBING RECORD

SIZE 2" UE DEPTH 3736

ACID RECORD

NO. GALS <u>no</u>	% _____
NO. GALS _____	% _____
NO. GALS _____	% _____

SHOOTING RECORD

NO. YDS. <u>no</u>	_____
NO. YDS. _____	_____
NO. YDS. _____	_____

FORMATION TOPS

Anhydrite	<u>1260</u>
Top Salt	<u>1350</u>
Base Salt	<u>2520</u>
Red Sand	_____
Brown Lime	<u>2690</u>
White Lime	<u>2860</u>
Oil or Gas Pay	<u>3700-3759</u>
Water	_____

INITIAL PRODUCTION TEST Flowed 24 Bbl. in 2 Hours Pumping _____ Flowing X
TEST AFTER SHOT OR ACID _____

INITIAL GAS VOLUME not measured

SCHEDULE NO. _____ DATE June 1, 1939

PIPE LINE TAKING OIL Texas New Mexico Pipe Line Co

REMARKS: _____ COMPANY Repollo Oil Company

BY: A. Scurtt

1. The first step in the process of identifying a problem is to define the problem clearly. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem.

2. The second step in the process of identifying a problem is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan.

3. The third step in the process of identifying a problem is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves taking the actions that have been identified in the plan and ensuring that the resources needed to implement the plan are available.

4. The fourth step in the process of identifying a problem is to implement the plan. This involves taking the actions that have been identified in the plan and ensuring that the resources needed to implement the plan are available. Once the plan has been implemented, the next step is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and identifying any areas that need further attention.

5. The fifth step in the process of identifying a problem is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and identifying any areas that need further attention. Once the results of the plan have been evaluated, the next step is to monitor the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the problem has been monitored, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem.

6. The sixth step in the process of identifying a problem is to monitor the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the problem has been monitored, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan.

7. The seventh step in the process of identifying a problem is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves taking the actions that have been identified in the plan and ensuring that the resources needed to implement the plan are available.

8. The eighth step in the process of identifying a problem is to implement the plan. This involves taking the actions that have been identified in the plan and ensuring that the resources needed to implement the plan are available. Once the plan has been implemented, the next step is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and identifying any areas that need further attention.

9. The ninth step in the process of identifying a problem is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and identifying any areas that need further attention. Once the results of the plan have been evaluated, the next step is to monitor the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the problem has been monitored, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem.
