Figure 1 consists of two parts. Part (a) is a side-view schematic of a participant seated in a car seat. The participant is holding a steering wheel and a control lever. A display is positioned in front of the participant. Part (b) is a top-down view of the car seat and steering wheel, showing the participant's position relative to the vehicle's center line.

• *Chlorophyll a* (Chl a) is the primary photosynthetic pigment in most plants and algae. It is a green pigment that absorbs light energy in the blue and red regions of the visible spectrum. Chl a is essential for the light-dependent reactions of photosynthesis, where it converts light energy into chemical energy in the form of ATP and NADPH.
