17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Rigged up a pulling unit on November 7, 1983. Set a CIBP at 3592' to temporarily abandon the Grayburg. Perforated the Penrose at 3516, 20, 24, 38, 52, 57, 62, 72, 77, 85, 87, 89 with 2 JSPF (24 holes). These new perfs were acidized with 1500 gallons of 15% NEFE. After 4 days of swabbing this well produced 40 BO and 91 BW. Rods, pump, and tubing were ran in the well and a pumping unit installed on November 17. This well is still being tested.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
