# THE EFFECT OF THE 1990-1991 BUDGET CUTS ON THE

TEACHING OF STATISTICS IN AMERICAN COLLEGES AND UNIVERSITIES

JOHN J. HURLEY, JR., and JAMES H. HURLEY, JR.

Abstract. This paper reports the results of a survey of 1,000 American colleges and universities regarding the teaching of statistics. The survey was conducted in 1992 and 1993. The results show that the teaching of statistics has become more important in American colleges and universities since 1990. The survey also found that the teaching of statistics has become more difficult since 1990. The results of the survey are discussed in the context of the 1990-1991 budget cuts.

Keywords: statistics, teaching, budget cuts, American colleges and universities

1. Introduction. The purpose of this paper is to report the results of a survey of 1,000 American colleges and universities regarding the teaching of statistics.
