16 (1/4 Sec. and Sec. No.) 12 (Twp.) 10 (Range) 10 (Meridian)
Salinas (Field) San Diego (County or Subdivision) California (State or Territory)

The elevation of the derrick floor above sea level is 1607 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Closon No. 1 was drilled to 3440', 2-1/2" tubing to 3440', circulated hole with mud, spotted 37 sacks cement and pulled tubing. Shot off 3 1/2" casing at 2670' but it was not free. Shot again at 2500' and varied pipe free. Pulled 21 joints (2521.14') of 3 1/2" casing. Ran 2" tubing to 2520', spotted 23 sacks. Pulled 21 tubing up to 1645', spotted 40 sacks of cement at base of 2-5/8" casing. Took strain on 2-5/8" casing but it was not free. Ran 10 sack cement plug in top of 2-5/8" casing. Plugging began 5-15-57 and was completed 5-16-57. The casing has been filled, the location cleaned up and a 4'-4 1/2" pipe was left for a marker at the abandoned location. Plugging operations were supervised by Mr. E. E. Colson, 111 South Park Street, Los Angeles (San County Casing Pullers) and Mr. E. E. Hansen, Production Foreman, and Mr. E. E. Schraff, Assistant Production Foreman for Citicor Service Oil Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
