NOTICE OF INTENTION TO ABANDON WELL.....	

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

April 10, 19 57

Well No. 2 is located 660 ft. from N line and 660 ft. from E line of sec. 19
NE 1/4 19 22 36 Meridian
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
South Bunka Lee New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3582 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was completed August 3, 1940, as a producing oil well at 3820'. Production of oil decreased to non-commercial status and water to over 90% prior to S.I. Remedial work is not feasible since attempts were made on both Closson "B" Wells No. 1 and 4 with negative results in both instances.

It is proposed to plug and abandon the well by reclaiming all possible 5 1/2" casing, landing hole with mud, spotting 35 sacks of cement to plug open hole extending into 5 1/2" casing, spotting 25 sacks of cement at the point where 5 1/2" casing is shot-off, spotting 40 sacks at the base of 8-5/8" casing at 1510' and 10 sacks in the top of the 8-5/8" casing, leaving a 4" pipe 4' above the surface as a marker.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
