Re: Clossen "B" #18-M SWD
Section 13, T22S, R36E
Lea County, New Mexico

Gentlemen:

In regard to your letter of February 13, 1993, of like caption, the Clossen "B" 18 SWD well was pressure tested by Gold Star on March 5, 1993. A copy of the pressure chart for the tubing/casing annulus is attached and shows a constant pressure of 315 psi for 15 minutes. The test was witnessed by Lyle of your staff, Jerry Guy of Hobbs and Ross Robinson of Eunice. This test demonstrates the positive mechanical integrity of the well.

Please note our current address as per this letterhead.

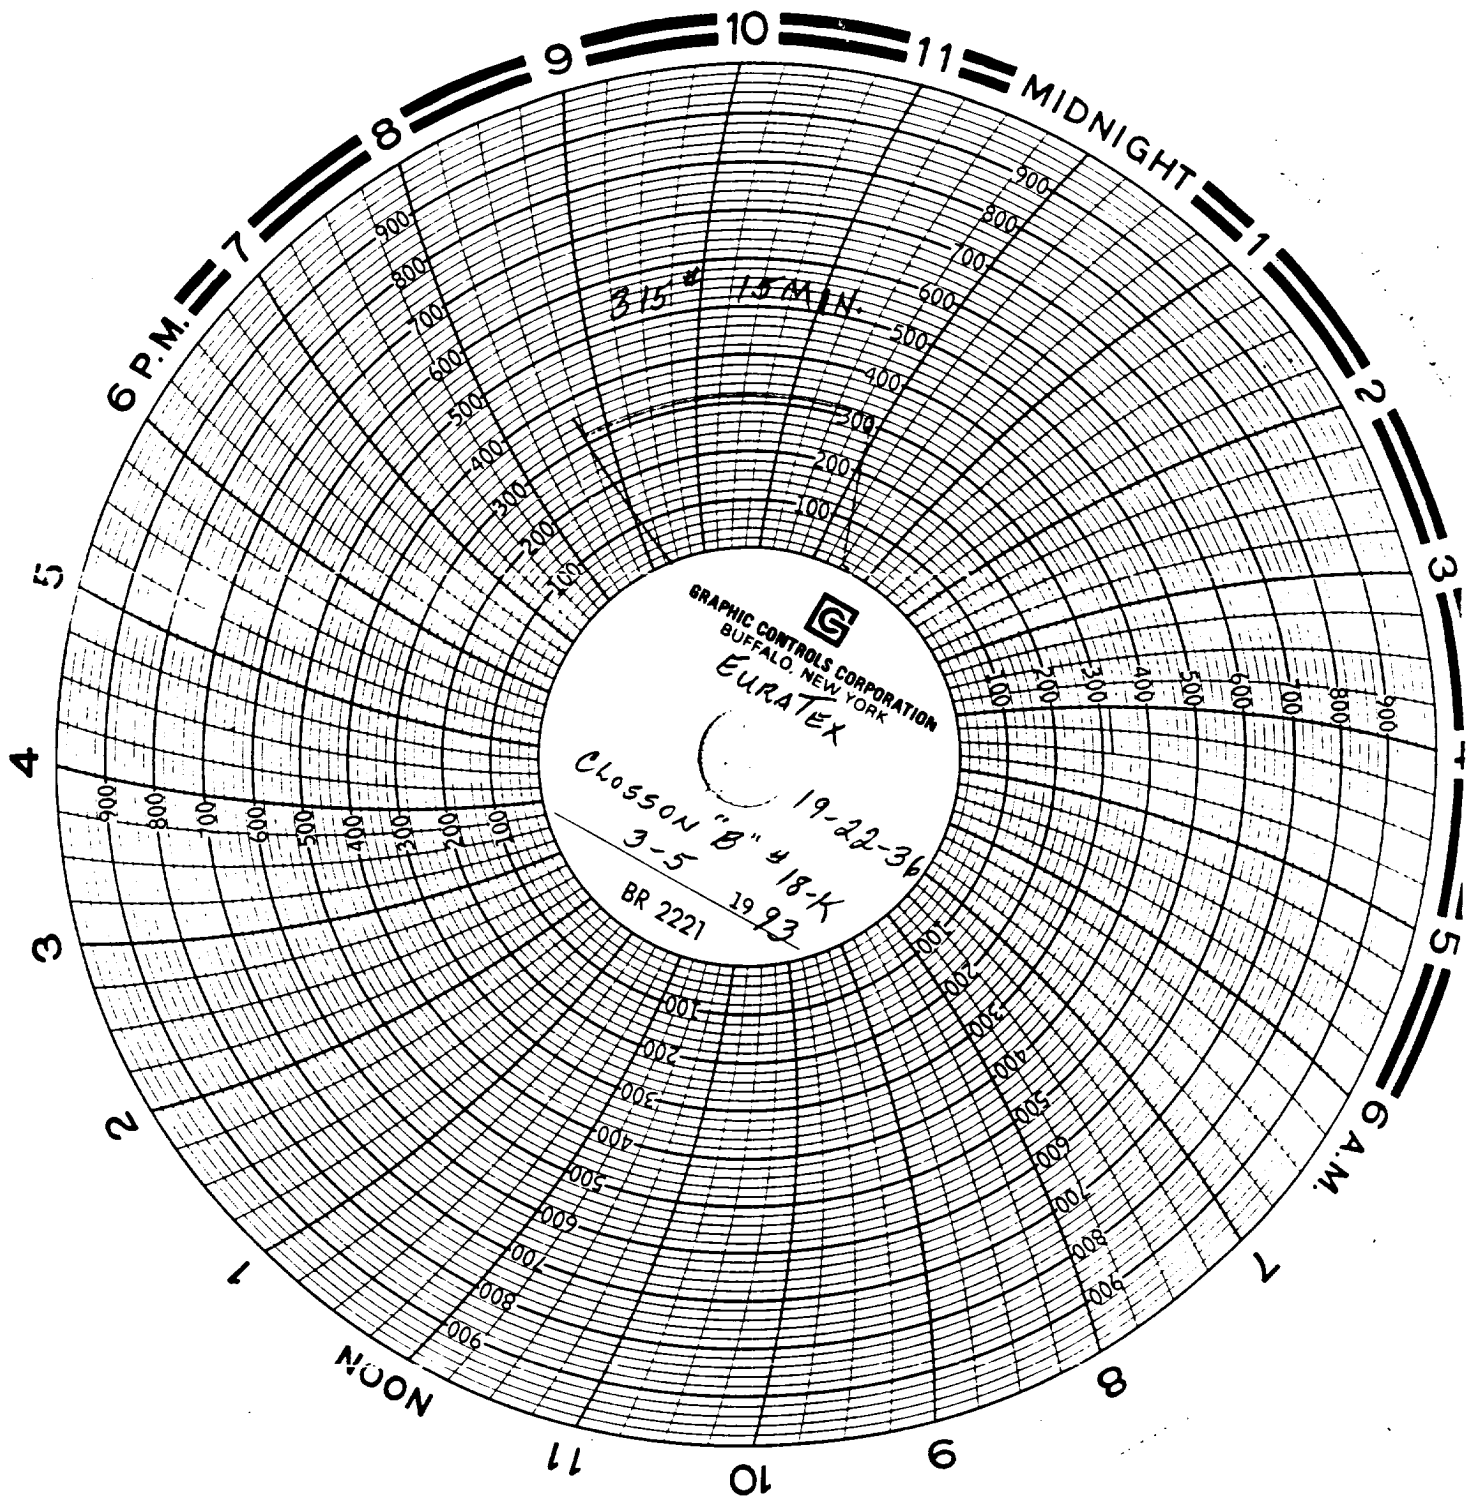

Should you have any questions, please call me.

Sincerely,

Euratex Operating Company
