Gentlemen:

Following is a notice of intention to do certain work as described below at the.....

Cities Service Oil Company      Closson - B      Well No. 6      in NW 4  
 Company or Operator  
 of Sec. 20      T. 22-S      R. 36-E      N. M. P. M.      South Eunice      Field.  
 Lea      County.

## FULL DETAILS OF PROPOSED PLAN OF WORK

## FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

The Cities Service Oil Company's Closson B No. 6 well has been temporarily abandoned as a 100 percent water well from its present producing zone through casing perforation from 3514' to 3534'. It is intended to plug back the well to shut off water, perforate casing above the new plug back total depth and try to recomplete as a gas well in the following manner: The well has a current BP depth of 3534' and has been producing through perforation from 3514' to 3534'. We intend to pull tubing and log the well with a gamma ray neutron log to 3534'. After logging we will run a retainer to approximately 3500' and squeeze off the water bearing formation by squeeze cementing. After water has been successfully squeezed off we intend to perforate the 5½" O.D. casing in the zones indicated on the gamma ray neutron log as possible productive and try to recomplete the well as a gas well. Should our first attempt fail to produce oil or gas other sections will be selectively perforated until all possible zones of pay have been tested.

Approved....., 19.....
