DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Size	Weight	Proposed Amount	Casing Program
8 5/8	24#	1465	To be cemented with sufficient amount to bring the cement to the surface
5 1/2"	15#	3740	To be cemented back with 150% of the calculated amount to bring the cement above the base of the salt.

Drill stem test to be taken in determining casing point on the 5 1/2" casing. Will probably want to acidize with at least 1000 gallons.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
