F. C. Meyer B-22 No. 6

Hobbs, New Mexico October 6, 1955

Well No. **6** is located **660** ft. from **N** line and **1980** ft. from **E** line of sec. **22**
SE 1/4 Section 22 **22S** **36E** **N.M.P.H.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
South Hedges **Lea** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well with rotary tools at the above location to a depth of approximately 3875' unless commercial oil production is encountered at a lesser depth. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

The following casing pattern will be used: 8 5/8" casing will be set at approximately 1925' and cemented with 700 sacks cement, cement to return to surface. 5 1/2" casing to be set at approximately 3875' and cemented with 725 sacks cement or as determined by caliper survey.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company **Continental Oil Company**
