Re: Application to Dual Complete
W. H. Turner No. 1 in the
Drinkard and Blinebry Pools,
Lea County, New Mexico

Attention: Mr. A. L. Porter, Jr.

Dear Sir:

Sinclair Oil & Gas Company respectfully requests administrative approval to dual complete its W. H. Turner Well No. 1 as a dual gas-oil well in the Drinkard Pool and Blinebry Gas Pool. This well is located in Unit L, Section 29, T21S, R37E, Lea County, New Mexico.

It is proposed to produce the Blinebry Gas thru the tubing-casing annulus and to produce the Drinkard thru the 2 3/8" OD tubing as is illustrated on the enclosed diagrammatic sketch. Also, you will find enclosed the appropriate Commission application form and plat of the area.

This Blinebry Gas acreage is dedicated, at present, to our Turner Gas Unit No. 3 located in Unit N, Sec. 29, T21S, R37E. However, upon successful completion of this well in the Blinebry, the appropriate Commission forms will be filed to reduce the gas allowable of the aforementioned gas unit.

Yours very truly,

W. F. Burns
Superintendent

* Should waivers from all offset operators not accompany an application for administrative approval, the New Mexico Oil Conservation Commission will hold the application for a period of twenty (20) days from date of receipt by the Commission's Santa Fe office. If, after said twenty-day period, no protest nor request for hearing is received by the Santa Fe office, the application will then be processed.

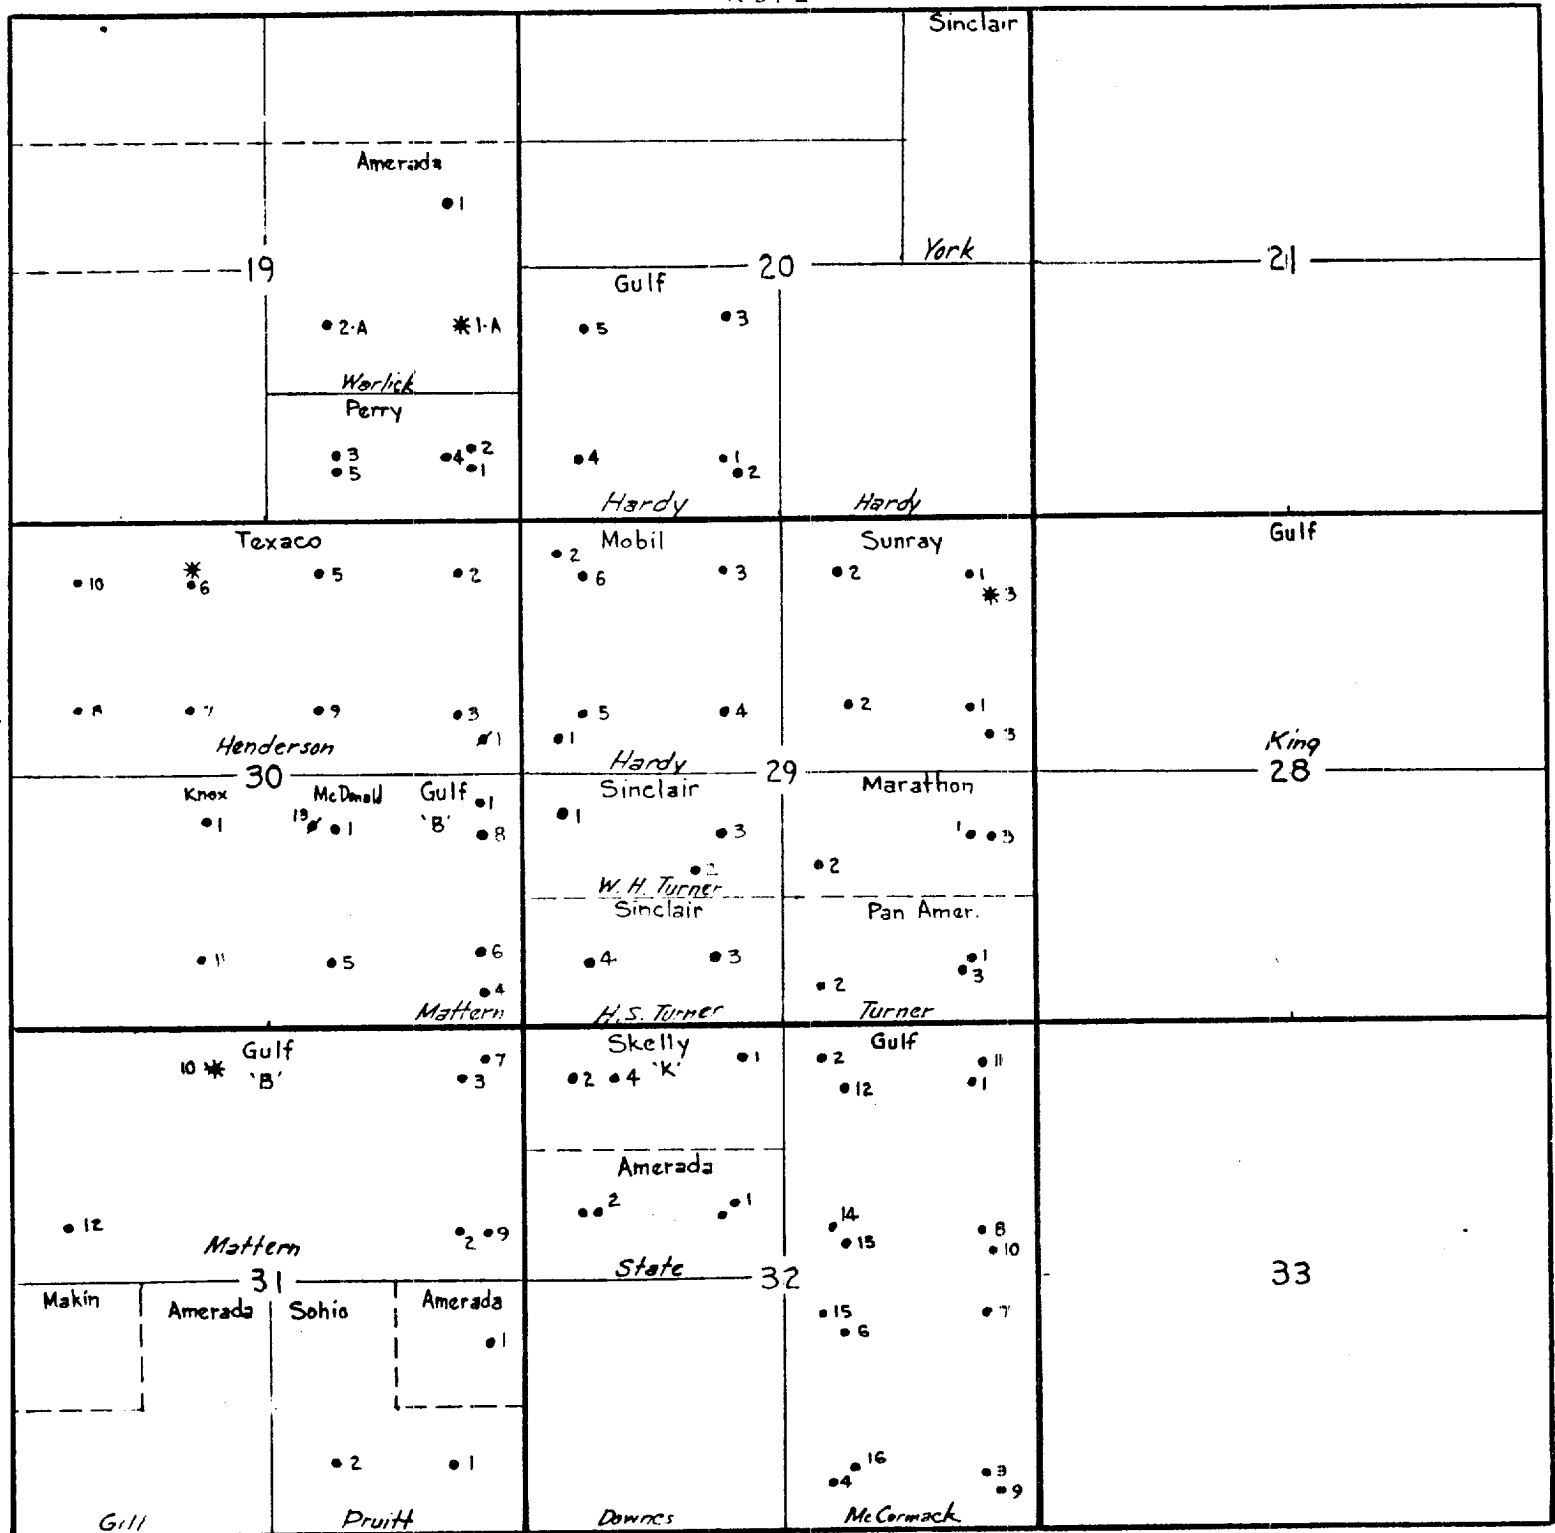

NOTE If the proposed dual completion will result in an unorthodox well location and/or a non-standard proration unit in either or both of the producing zones, then separate application for approval of the same should be filed simultaneously with this application.
