The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well with rotary tools at the above location to an approximate TD of 6650'. Plans call for dual completing in the Weir Blinberry & Monument Tabb formations. Casing will be set in accordance with USGS regulations and other special requirements will be complied with.

The following casing pattern is planned: 8-5/8" OD 24 # J-55 casing set at 1320' with 500 sacks cement, cement to circulate; 5-1/2" OD 14# & 15.5# J-55 casing set at 6650' with 475 sacks cement, cement to return to 2300'.

Permission to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
