Re: Walker #1
Lea County, New Mexico

Dear Mr. Ramey:

Attached is Form C-105 relative to the captioned well.

The cement retainer was set at 6936' to squeeze the perforations from 7199' to 7582'. Inadvertently we not only squeezed the perforations but also cemented up the hole. The cement set up before we pulled the tubing. We washed over and pulled tubing down to 6549' and suspended operations.

We will advise when it has been decided whether to plug and abandon or to clean out the hole and attempt completion.

Yours very truly,

SOLAR OIL COMPANY

Marilynn J. Smith
