This is a request to suspend production on the above referenced well for the
time period as designated by the Bureau of Land Management or until such time that
the price of crude oil reaches an acceptable economic level.

This well is an oil well capable of production, but in quantities of less
than ten barrels a day. At present the cost of operation exceeds the revenue
obtained from it.

In the absence of an approved suspension, there may be a premature abandonment
of the well and a resulting loss of recoverable reserves.

This lease is in its primary term as is scheduled to expire October 31, 1991.
