ALTERING CASING ☐

PLUG AND ABANDONMENT ☐

17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was shut in on June 25, 1970 when it became uneconomical to produce. The tubing was removed and well capped w/2000# WOG valve. In January, 1972 shut in pressure started increasing to a high of 1480# on 2/28/72. In order to protect the long casing string the well was killed; ran packer & BP and tested the 5½" casing from surface to 6637' w/1000# for 1 hr. Held OK. Ran 2-3/8" EUE 8R tubing w/Guiberson KV-30 packer set at 6540'. Loaded annulus w/inhibited brine. Are now testing well for commercial production and will apply for allowable when needed.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
