17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was shut in on June 25, 1970. Average production last three months was 158 BOPM and it is not economical to pump this well at this depth (7350' TD, perforations 6780-7283'). We propose to hold this well for possible future secondary recovery operations. All rods, tubing and other downhole equipment have been removed from the well.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
