C-101, C-102, C-103, C-104, C-105, C-116

Dear Ms. Morgan:

In August 1990 The Wiser Oil Company began a recompletion of the referenced well by plugging the Drinkard zone and perforating the Tubb. Due to some oversight, no application for permit to recomplete was filed, nor any completion papers when the work was completed. In addition, all production reported on monthly C-115 from September 13, 1990 through November 2000 has been erroneously reported in the Drinkard instead of the Tubb.

Through conversations with both you and Fran Chavez in Santa Fe, I am filing the following reports to correct this problem: C-101 Application for Permit to Recomplete for the Tubb, C-102 Well location and acreage designation plat, C-103 Sundry of recompletion activities, C-104 Request for Allowable and Authorization to Transport, C-105 Completion report for the Tubb, and C-116 Gas-Oil Ratio test.

Upon your receipt and acceptance of this information, Ms. Chavez will be able to programmatically change all affected production from the Drinkard to the Tubb zone. In addition, upon acceptance of this completion, The Wiser Oil Company will apply for a commingling permit to commingle the Tubb and the recently recompleted Blinbry zones.

If you should have any questions or require additional information, please contact me at (214) 360-3592.

Sincerely,

Catherine A. Aniello  
Regulatory Specialist
