Re: Owen #8-I  
Section 35, T21S, R37E

Gentlemen:

We are returning the C-104 for the recompletion of the above-referenced well in the Tubb Oil and Gas Pool. Since the well is non productive this form is not necessary. If at a later date the well is placed on production you will need to submit a C-104 for allowable assignment.

This well is considered a dual completion in the Tubb and Wantz Abo and a packer leakage test is required at completion. Rule 112-A VI(c) requires that a packer leakage test be taken 15 days after completion. Please submit packer leakage test immediately and annually thereafter.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton  
Supervisor, District I
