Attention: Mr. Joe D. Ramey

Gentlemen:

Please cancel the hearing, Docket No. 6307, on Exxon's application for downhole commingling in the F. F. Hardison "B" #10 well located in Unit A, Section 34, T21S, R37E, Lea County, New Mexico. This hearing is scheduled for August 30, 1978.

This well is now capable of producing only 4 barrels oil per day with no water from the two zones. We plan to test the well for another two weeks to determine if an Administrative request for downhole commingling will be submitted or to plug and abandon these zones.

Yours very truly,

L. H. Byrd

HNR/aw
