7. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Well is presently perforated 3444 to 3545 with 21 holes and interval 3178 to 3380 with 48 holes. We have tested subject well and determined it is not economical to produce because of water production. We propose to set a cement retainer at 2000' and squeeze existing perforations with 900 sacks of cement to prevent cross flow of water between the different sets of perforations.

8. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
