

8. ANCILLARY FACILITIES:
 - A. None required.
9. WELLSITE LAYOUT:
 - A. Exhibit "D" shows the relative locations of the pad, mud pits, reserve pit, trash pit, and locations of major rig components.
 - B. Only minor leveling of the wellsite will be required. No significant cuts and fills will be necessary.
 - C. The reserve pit will be plastic-lined.
 - D. The pad and pit area has been staked and flagged.
10. PLANS FOR RESTORATION OF THE SURFACE:
 - A. After finishing drilling and completion operations all equipment and other material not needed for operations will be removed. Pits will be filled and leveled, and location cleaned of all trash and junk to leave the wellsite in an aesthetically pleasing condition as possible.
 - B. Any unguarded pits containing fluids will be fenced until they are filled.
 - C. After abandonment of the well, any special rehabilitation and revegetation requirements of the surface management agency will be complied with and accomplished as expeditiously as possible. All pits will be filled and levelled within 90 days after abandonment.
11. OTHER INFORMATION:
 - A. Topography: Land surface is gently rolling, fairly smooth, and sandy.
 - B. Soil: Fine sand underlain by caliche.
 - C. Flora and Fauna: The vegetative cover is generally sparse and consists of mesquite, yucca, sand sage, and native range grasses. Wildlife in the area includes rabbits, coyotes, reptiles, dove, quail, and other inhabitants typical of semi-arid desert land.
 - D. Ponds and Streams: There are no rivers, lakes, ponds, or streams in the area.
 - E. Residences and other structures: The nearest occupied dwelling is a house located 2 miles north-east of the wellsite. No known water well exists within a 2 mile radius.
 - F. Archeological, Historical, and Cultural Sites: None observed in the area. Archeological Inspection Report is forthcoming.
