

between proposed Units 68 and 69. The borrow pit prohibits the straight north to south access route customary to these operations. At the advice of Mr. Allen Fredrickson of the Continental Oil Company, the access corridor follows the contour of the western edge of the borrow pit 90 feet from its lip until the North to South line between Units 68 and 69 is encountered on the north side of the borrow pit. At this point the access route turns north and proceeds to Unit 68 (See Figure 2).
