☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Conoco proposes to pull the ESP on this well and set a CIBP @ 8825' and dump 35' of cement on top, reacidize and swab test the Strawn. At that time it will be determined whether to put the well back on production or abandon the Strawn. If the Strawn tests uneconomic Conoco will run in hole with 5 1/2" CIBP and set at 7600' (22' above top Strawn perf) and dump 35' of cement on top, notify NMOCB and perform MIT test for temporary abandonment.
