13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

It is proposed to temporarily abandon the Drinkard completion in this well and to recomplete in the Monument Tubb Pool as follows:

1. Set CIBP at 6990' and spot 35' cement plug on top.
2. Perforate Monument Tubb from 6374'-7526' with 1 jsfp.
3. Sand frac Monument Tubb and put on production.

The Monument Tubb Pool has 80-acre spacing, but this well only has 40 acres available for dedication. Therefore, it will receive a 1/2 allowable or 111 BOPD allowable.

An application is being filed with the NMOCD to establish a non-standard 40-acre proration unit for this well.

After sufficient Monument Tubb production history is available, downhole commingling with the Drinkard approval will be sought.
