OTHER ☐

Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

It is proposed to reperforate zones w/the lowest injectivity, add pay at 3770-72, 3860-62, 3868-70 and straddle acidize all perfs to improve injectivity and overall sweep efficiency. It is also recommended that straddle packers be utilized to isolate and prevent injection into perfs above the GOC at 3726-30.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
