Recommendation for renewal of Temp. Abandonment

This well is currently Temporarily Shut-in. It is recommended that the well be updated to Temporary Abandonment status upon passing the required casing integrity test. A CIBP has already been set @ 6600' and we will run a CIT test as soon as possible upon approval of intent. Currently we are still evaluating further possible up-hole potential in the 7 Rivers.

1. Circulate Casing with inhibited packer fluid.
2. Pressure test casing to 500# for 30 minutes. Give OCD 24 hrs notice prior to pressure test.
