Re: H. T. Mattern (NCT-E) #15-E, Sec 12, T22S, R36E

Dear Mr. Bohon:

The allowable for the above referenced well is approved by virtue of the faxed copy of the C-104, on November 19, 1990.

Nelda Morgan in the proration department has called Pride Pipeline and given them verbal approval to move the oil effective this date.

The request for surface commingling is approved and limited to a period of 30 days.

The paperwork will be processed when the original forms are received in this office.

The well was permitted as a gas well with approval for a non standard proration unit of 480 acres. Since the well has been completed as an oil well, we request that you submit a new Form C-102, dedicating a standard proration unit of 40 acres to the well.

Very truly yours

OIL CONSERVATION DIVISION
