RE: Warren Unit Tubb Bty 1 Well #98
Unit A sec 28, T20S, R38E

Gentlemen:

*File letter
attached to
BHE*

We have this date assigned an allowable to the Tubb zone in the above-referenced well. However, since this is a dually completed well with the Blinbry zone you need to file a packer leakage test.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I

ed

P.S. You will also need to resubmit your application for multiple completion for the Blinbry and Tubb since it was originally approved for the Blinbry and Drinkard formations.
