RE: Conoco, Inc., Commingling Order PLC-67, SEMU and Burger "B-20",  
"BMT" battery, Section 18, 19, 20, 29, & 30, T20S, R38E, Lea County,  
New Mexico - Request for Amendment of Order

Dear Mark,

The Oil Conservation Division has previously approved the commingling of McKee, Blinbry, and Tubb production from Sections 18, 19, 20, 29 and 30, T20S, R38E at Conoco's SEMU "BMT" battery. Please see attached a copy of the latest "Amended", Commingling Order PLC-67 pertaining to this production facility.

The Burger B-20, Well #4 is currently approved under the above referenced order to produce Warren McKee pool "sweet" production into the battery. The oil is metered separately and then commingled in the run tank. The gas is metered and sold to GPM via a total flow gas meter. Conoco intends to recomplete Well #4 in the East Skaggs Abo pool. The Abo crude oil production gravity is sweet and has a gravity of 45 API degrees. The "BMT" battery oil gravity is 41.6 API degrees. We do not believe that the Abo gravity would effect the price per barrel.

Conoco is requesting permission to add production from the East Skaggs Abo to the existing Commingling Order PLC-67. I have enclosed copies of the area map and battery diagram. If you need any further information concerning this request, please contact me as listed below. Thank you.
