RE: Hardy 36 State, Well #1, Section 36, T20S, R37E, Lea County, NM

OCD:

Concerning the above referenced well, we received a call from your office requesting the form C-103 which supplements the information provided on the recompletion C-105 filing of 6-18-98. On the same date we filed the C-103, which perhaps may have been lost in the shuffle - we have enclosed a copy of the C-103 which we submitted. If this C-103 does not contain sufficient information concerning the recompletion, please let us know @ 1-800-432-2967.

To the best of my knowledge, currently the well is being produced in the South Cass Strawn only and still has a RBP @ 7745'. I have enclosed a copy of the DHC order for this well ; it is my understanding that the well will be DHC in the South Cass Strawn and the Hardy Simpson-Ellenburger. I will verify that the latest C-103 reflects the current status of the well. Thank you.

Yours truly,

Ann E. Ritchie, Regulatory Agent
