RE: Hardy 36 State well #3, Lea County, NM. API# 30-025-32479,
Sec. 36, T 20S, R 37E

Dear Mr. Sexton:

Conoco spudded this well on 4-25-94, to a TD of 7000'. The Drinkard zone was then cased. On 8-5-94 we set a RBP at 6680' to isolate the Drinkard and perfed the Tubb from 6423' to 6593'. The Tubb completion is currently testing, making around 200 bbl of oil per day. We will make every effort to final this well within the next 10 -15 days as a Wildcat Tubb producer.

Attached is the Gas-Oil Ratio test (C-116) that you requested.

If you need additional information contact Bill R. Keathly at (915) 686-5424.

Yours very truly
