13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Waterflood operations were suspended for the McKee zone effective 8/97 for evaluation. Since that time the production from the McKee zone has fallen at an unacceptable rate. Also, production from the most recent Conoco completion in the McKee in Section 29 will be enhanced by re-injecting.

We propose to put this well back into use for injection effective 1-1-99.
The permit for the McKee injection project is Order No. WFX-566.
