The Littman 8 Federal #1 is currently producing water from the Wildcat-Seven Rivers and Littman-San Andres formation at a rate of 2.90 BWPD. Samples of the water have been sent in for analysis and the results will be sent on a subsequent notice. The water from the well is stored in a 500 gallon fiberglass tank. Water from this well and future wells on the lease will be hauled off the lease by water trucks to the Lakeside 11-SWD well.

We request approval to dispose of water in the above manner. See attached water analysis.
