Dear Steve:

Enclosed please find ASC Report 96-114, covering the archaeological survey of the Littman 8 Federal Well No. 2 and Access Road R/W.

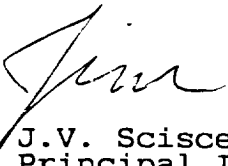

Since there were no significant archaeological finds, we have recommended archaeological clearance for the well pad and access road. Copies of the report have been distributed as per the list on the title page, and you need not concern yourself with distribution to those agencies.

Should you need to alter the access road centreline, you will need to stake the centreline, file a sundry notice with Barry Hunt and notify Eric Dillingham (Archaeologist) that the access road will be outside of the archaeologically inspected R/W.

Also enclosed please find ASC Invoice 96-114, for performance of the survey. An ASC Rate Sheet (effective as of October 1, 1996) is included for your files.

We are pleased to have been of service with this project, and hope to assist you in the future. Should you have questions concerning the project, please call our office.

Sincerely,

J.V. Sciscenti
Principal Investigator
