This well is currently producing in the Warren; Tubb, East (6488' - 6814') and we propose to dual complete this well in the Blinebry Oil & Gas Pool. We plan to set a RBP at 6350' and perf the Blinebry from 5982' - 6100'. We then plan to stimulate and test the Blinebry zone. The Tubb and Blinebry will be completed seperately downhole and each will have a separate heater treater and meter at the surface. The two zones will then share a common tank battery.
