13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Conoco, Inc. completed this well in the Strawn however production is not commercial. A sundry to T&A the well was submitted December 10, 1999 and approved January 3, 2000. Based on Conoco's success in the offsetting well, SEMU # 136, another sundry was submitted December 22, 1999 and approved December 27, 2000 to recomplete this well to the Tubb. At the same time a request for a non-standard location order was submitted for the Tubb interval and denied by the State. The denial was based on the fact that the well is located 10' off a state lease line and the 40 acre prortion unit would have allowed a blatant violation of correlative rights. Conoco is currently working on a royalty sharing agreement and as soon as possible will recomplete this well to the Tubb. Currently, this well will remain shut-in.

14. I hereby certify that the foregoing is true and correct
