7. Methods of Handling Waste Disposal

    A. The drill cuttings, fluids and completion fluids will be placed in the reserve pit. The reserve pit will be fenced on three sides away from the pad during drilling and the fourth side fenced as soon as the rig moves out. The reserve pit will be allowed to dry, and materials remaining in the reserve pit buried. The reserve pit will be backfilled, leveled and contoured so as to prevent any materials being carried into the watershed. Upon completion, the pad will be leveled, contoured, and reseeded with the appropriate seed mixture as specified by the surface managing agency.

    B. All garbage and trash will be hauled away to designated landfill by Conoco.

    C. Chemical toilets will be provided and maintained during drilling operations.

8. Ancillary Facilities

    No ancillary facilities are planned.

9. Wellsite Layout

    See attached Wellsite Layout. The V-door faces East. The reserve pit will be lined with plastic and the pad and pits are staked. All unguarded pits containing liquids will be fenced and any unguarded pit containing liquids will be fenced.

10. Plans for Restoration of Surface

    Reserve pits will be rehabilitated once drilling fluids have been allowed to evaporate to the point the pits are dry enough for backfilling and leveling. In the event drilling fluids will not evaporate in a reasonable time period, the fluids will be removed and transported by tank truck to a state approved disposal facility. Backfilling and leveling of the location will be completed within a time period of one year upon cessation of drilling operations.

11. Surface Ownership

    The well site surface ownership is S & W Cattle Company.

12. Archeological Clearance

    An archeological survey is being conducted and will be provided upon completion.

13. Operator's Representative and Certification

    The person who can be contacted concerning compliance of this Surface Use Plan is:

    Stephen R. Wilson
    10 Desta Drive, Suite 643W
    Midland, Texas 79705
    (915) 686-5794
