FAX

RE: Conoco, Inc., State "25-A", Well #3, North Hardy Strawn Pool
Section 25, T20S, R37E, Lea County, New Mexico

Please see faxed below the test C-104 for the above referenced well. Conoco anticipates fracing the well on Saturday, July 8, 2000 with the possibility of crude oil sales from this well on Sunday, July 9, 2000. The well will be produced for approximately one week, then shut-in for pressure build-up and construction of gas line.

Please let me know if you have any questions concerning this testing allowable request. I went ahead and based the bbls on July 8th through July 31st @ the top allowable for the North Hardy Strawn @ 600 bbls per day. *(If you think it should be less - let me know.)*

Thank you,

Ann E. Ritchie, Regulatory Agent
