13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markders and zones pertinent to this work.)*

Pogo Producing Company respectfully request permission to P&A the current 6-1/8" portion of the wellbore from 12697' to 14743' with a full column of class "H" cement. We propose to sidetrack immediately below the 7" casing string which is set @ 12697' and directionally drill to a subsurface location of 660' FSL & 1820' FEL @ 14560' TVD & at a total depth of 15200' TVD anticipated BHL= 660' FSL & 1198' FEL of Section 13, T22S, R32E. A DST evaluation was made in the vertical portion of the current 6-1/8" hole w/ very poor results. A gamma ray caliper log was run from 14743' TD to 12400' to determine packer seat & log correlation for the DST. No other open hole logs were run in this portion of hole. All other aspects of the approved Federal Permit will remain the same.
