NOTICE OF INTENTION TO DEEPEN WELL			

Hobbs, New Mexico July 21, 1950

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the _____

Hudson and Hudson Amerada-State Well No. 1 in C-SW $\frac{1}{4}$ SW $\frac{1}{4}$
Company or Operator Lease
of Sec. 35, T. 21S, R. 33E, N. M. P. M., Wildcat Field
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This test has been drilled to depth of 3700' and has there encountered approximately 2000' of sulphur water. A string of 7" casing has been cemented in an 8 $\frac{1}{2}$ " hole with 50 sacks and 8 $\frac{1}{2}$ " casing has been cemented in a 11" hole at 1600' with 100 sacks. A surface st ring of 13/3/8" has been cemented at 165' and cement has been circulated to surface.

The 7" casing was cemented at 3694'. We propose to set 10 sacks of cement in the bottom of hole and after determining that it has set we will recover as much 7" as possible. We will then set a 10 sack plug in the bottom of the 8 $\frac{1}{2}$ " casing and recover as much of this string as possible. We will leave the hole full of heavy mud and set a cement plug in top of the surface string with a regulation marker cemented in it and extending 6 feet above the surface of ground.

Location site will then be cleared off and left as near as possible in its original condition.

Approved _____, 19____
