

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, results of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL			

Santa Fe, New Mexico
Place

December 26, 1944
Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the _____

Wilson Oil Company State B-6807 Well No. 15 in the
COMPANY OR OPERATOR LEASE
SWIFT of Sec. 13, T. 21, R. 34, N. M. P. M.,
West Eunice Field, Lea County

The dates of this work were as follows: _____

Notice of intention to do the work was (was not) submitted on Form C-102 on _____ 19____
and approval of the proposed plan was (was not) obtained. (Cross out incorrect words)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Run 122 feet of 16" O.D. 70 lb. casing and cemented
with 150 sac (Halliburton) October 30, 1944- shutoff

Run 3714' of 7" O.D. J 55- 20 lb. casing and cemented
with 300 sac (Halliburton) Dec. 20, 1944- shutoff

Witnessed by Halliburton
Name Company Title

Subscribed and sworn to before me this 26th
day of December, 19 44
Frederick
Notary Public

I hereby swear or affirm that the information given above
is true and correct.

Name Francis J. Wilson
Position President
Representing Wilson Oil Company
Company or Operator

My Commission expires July 12, 1945

Address Box 627, Santa Fe, New Mexico

Remarks:

Ray Yurroughs

1. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x f(t) dt + g(x)$$

where $g(x)$ is a given function. It is shown that if $g(x)$ is a continuous function, then $f(x)$ is also a continuous function. Moreover, if $g(x)$ is a differentiable function, then $f(x)$ is also a differentiable function. The proof of these statements is given in the first part of the paper.

In the second part of the paper, we study the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x f(t) dt + g(x)$$

where $g(x)$ is a given function. It is shown that if $g(x)$ is a continuous function, then $f(x)$ is also a continuous function. Moreover, if $g(x)$ is a differentiable function, then $f(x)$ is also a differentiable function. The proof of these statements is given in the second part of the paper.

3. The third part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x f(t) dt + g(x)$$

where $g(x)$ is a given function. It is shown that if $g(x)$ is a continuous function, then $f(x)$ is also a continuous function. Moreover, if $g(x)$ is a differentiable function, then $f(x)$ is also a differentiable function. The proof of these statements is given in the third part of the paper.

4. The fourth part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x f(t) dt + g(x)$$

where $g(x)$ is a given function. It is shown that if $g(x)$ is a continuous function, then $f(x)$ is also a continuous function. Moreover, if $g(x)$ is a differentiable function, then $f(x)$ is also a differentiable function. The proof of these statements is given in the fourth part of the paper.

5. The fifth part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x f(t) dt + g(x)$$

where $g(x)$ is a given function. It is shown that if $g(x)$ is a continuous function, then $f(x)$ is also a continuous function. Moreover, if $g(x)$ is a differentiable function, then $f(x)$ is also a differentiable function. The proof of these statements is given in the fifth part of the paper.
