Gentlemen:

Order R-9645 approved 160 acre gas proration units for the above-referenced pool when it was designated as an associated pool. As required by that order you advised the district office of the unorthodox locations of four wells and filed revised C-102's for the State P #6 (40 acres), Kaiser State #42-J (80 acres), and State B #12 (80 acres).

R-9645 did not give the district office permission to approve non-standard proration units so in order to fulfill the letter of this order you must make an administrative application to our Santa Fe office requesting approval of these three non-standard proration units.

We are assigning a gas allowable to these wells based on the proposed dedicated acreage and you will be expected to comply with getting these approved within 60 days or your allowables will be cancelled.

If you have any further questions, please contact Evelyn Downs at (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION
