17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The water-oil ratio on the above well has increased significantly since the present zone was squeezed in February, 1982. It is proposed to squeeze the existing perforations from 3765'-67'. Once this is done we will perforate the same interval in hopes that the water production will be reduced.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
