17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This report is being filed to update a previous C-103 dated 12/8/81. Due to the high amount of water production after the first workover the following remedial work was done in an attempt to squeeze off the water. The bridge plug that was set at 3780' was drilled out and pushed to bottom. The two sets of perforations from 3786'-99' and from 3765'-73' were squeezed off with 200 sxs thick set, 1000 gals flowcheck and 150 sxs CI "C" cement in stages. We then reperforated 2 spf at 3765', 66', 67', (6 holes total). These perforations were acidized with 200 gallons acid. Rods and tubing were then run and the well put on pump. A request for change in allowable will be filed shortly as soon as an accurate test can be obtained.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
