OTHER Acidizing to stimulate production ☒

17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The subject well was acidized with 1500 gallons of special low surface tension acid of which 200 gallons contained PPA and 200 lbs. of mothballs. The latter of which was used to break down two or more possible zones of oil production. The work was performed on August 31, 1967 and as of this date we feel we do not have stabilized production. Thus, a production test is not included herewith.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
