**FULL DETAILS OF PROPOSED PLAN OF WORK**  
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

Gas lift operations were effective September 30, 1964. This operation was undertaken in an effort to move a larger volume of fluid and thus recover additional oil that could not otherwise be recovered. The oil production has declined to ratio of 6 barrels of oil to 1,800 barrels of water per day. Permission is requested to deepen the subject well in an effort to obtain additional producing zones and reduce the water-oil ratio. It is expected that the well will not be deepened more than 100 feet below the present total depth 3736 feet. Permission is also requested to acidize the well with not more than 3,000 gals. in the event stimulation is desirable.
