17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The subject well was logged and perforated at various points from 3707-08, 3713-14, 3718-20, 3720-24, 3850-52, and 3856-60. It was determined from testing these zones that there was communication between the perforations behind the 9-5/8" casing. This interval in the formation is made up of Seven Rivers reefing dolomites and from past experience it would be impossible to obtain a satisfactory cement squeeze job. The well is now temporarily abandoned. We are awaiting the possibility of re-entering and cleaning out the well for an attempted completion in the Morrow sand.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
