OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

Stanolind Oil & Gas Company Mascho Unit Well No. 1 in SW/4 of SW/4
Company or Operator Lease
of Sec. 31, T. 21-S, R. 34-E, N. M. P. M., Wildcat Field,
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Subject well was drilled to total depth of 4308', penetrating the reef lime. Drill stem test was made 11-24-45, tool open one hour, sulphur water rose 2790' in drill pipe with no indications of oil or gas.

We propose to plug and abandon in the following manner: Place a 35-sx. cement plug at bottom, filling back to approximately 4200', and with hole filled with heavy mud laden fluid, spot a 15-sx. cement plug in bottom of 9-5/8 casing set at 1867' w/ 250 sx. Recover as much of this pipe as possible (estimated) 800' and place a 15-sx. cement plug in top of 13-3/8 surface casing set at 210' cemented to cellar floor with 200 sacks. This string will be left intact, and a 4" pipe marker will be set in cement to extend 5' above ground level. Cellar and pits will be filled and the location leveled to conform with surrounding terrain.

Approved _____, 19____
except as follows:

Stanolind Oil & Gas Company
Company or Operator
