Mr. Roy Yarbrough  
Proration Office  
New Mexico Oil Conservation Commission  
Hobbs, New Mexico

Dear Mr. Yarbrough:

Recently we have acquired controlling interest in the State of New Mexico "A" Lease, Lynch Pool, Lea County, New Mexico. This lease which at present has two producing wells was formerly owned and operated by the General Crude Oil Company. As operated by the General Crude, this lease was known as the State of New Mexico "B" lease; the well designations were numbers 1 and 4. We are continuing to produce the two wells with similar numerical designations.

As we will be in need of the proration and production data as published in your monthly and annual Order Numbers, would you please include us on your mailing list for these publications as well as any other information which your office might distribute.

Yours very truly

R. DE CHICCHIS
